# Introduction to Advance Packing Ltd

# Professional Export Packing Services

**At Advance Packing Ltd, our comprehensive range of professional packing services coupled with logistic capabilities gives us the flexibility to manage any shipment. Whether it be project, on/off-site packing or case supply only, our expert packing teams are fully equipped to handle goods of any size, weight and type.**

We offer cost effective and efficient packing solutions, tailor-made to suit your needs, criteria and budget. Listening carefully and strictly adhering to the specification of the job, our clients have the reassurance that their consignments will arrive safely at their destination, within the agreed terms and contracted time-frame.

## PROFESSIONAL EXPORT PACKING SERVICES

### Project Packing

Quite often project work can be full of pitfalls and it is our job to identify and eliminate those unexpected difficulties. We use our years of knowledge and experience to review contract guide-lines, frequently set out by persons with limited exposure to the technical side of export packing and determine how contract specifications can be fulfilled.

### Specialist Export Packing

Over the years we've been faced with many challenging contracts with unusual requests, interesting objects and tough environments. We bring together our experience and design ideas to find a solution that not only works but gives the buyer total confidence that it is a high quality product they are receiving.

### On-site Packing

To a lot of our clients, it is pleasing and somewhat reassuring to see first-hand the packing process as it happens. This could be for a multitude of reasons so our highly skilled packing teams will attend your premises or a designated site of your choice for packing prior to moving the goods.

### Devan and containerisation

We are able to handle in/outbound containers at our premises and devan for delivery on curtain sided vehicles as well as securing container loads safely for export.

### Hazardous Packing

This is a niche product with strict guidelines and legal regulations that must be adhered to. The packing of hazardous goods needs to be completed in-line with global ADR regulations so the product classification can be quickly identified during transportation.

### Rapid Packing

If you are looking for a quick turnaround on export packing services or case supply, we offer a priority service for time critical orders.

# Materials

# Strengths

All of the materials used by our packing division are of the highest quality and are in-line with ISPM15 regulations, accepted by all global markets. This helps us achieve a superior end product.

## Our service

- Efficient and reliable
- Speedy response to quotes
- Flexible

**On site measuring with no obligation**

# Supply

## Bespoke cases, crates and pallets

Your product is unique so we work with you to create a bespoke packing solution that not only ensures the product is packed safely but the overall size of the shipment is kept to a minimum for transportation purposes. Less volume = lower shipping costs.

## Assembled cases, crates and pallets

The ready-made case, crate or pallet is delivered to your premises for the product to be packed by your own member of staff in-house. This is a cost effective way of packaging goods and we offer advice on positioning and securing of the product.

## Flat pack kits

The cost of supplying a flat pack kit does not differ too much from the assembled option however, it is a good solution for clients with limited storage space when purchasing multiple quantities.

## Materials

If you are looking to pack in-house, materials can be purchased from our packing department and all in compliance with ISPM15 regulations. Materials available: Timber, Plywood, foil bags, desiccant packs, shock-watches, tilt-watches, shrink-wrap, bubble wrap and polystyrene inserts.

Any size,  
any specification.
